What do YOU want to hear?

The MS "Magnolia" Chapter of SWANA holds these conferences to provide opportunities for members of the solid waste industry and other similar fields to learn about important topics covering everything from back-to-basics concepts to new technology advances.

We try to tailor these topics to fit the needs of those who benefit from them the most, our attendees. We want to keep providing content that is equally engaging as it is interesting, and the best way we can do that is to get feedback from you.

Let us know of any topics you feel we should cover at future conferences. If you or someone you know is interested in speaking or you just have an idea we should look into please let us know either at the conference or with this form, and let's make sure you get to hear what's important to you.
